OBJECTIVE

Computer Science undergraduate with hands-on project experience in Machine Learning, NLP, Generative AI (including LLMs and RAG systems), and SQL-based data handling, seeking the AI/ML Engineering Internship at Youngsoft India to apply strong Python, data preprocessing, and model development skills to real-world AI/ML projects as part of a collaborative engineering team.

EDUCATION

Sridevi Women's Engineering College, Hyderabad 2023 – 2027
B.Tech in Computer Science and Engineering — CGPA: 8.34 / 10

MPJTCWR Junior College 2021 – 2023
Intermediate (MPC) — 913 / 1000

Sri Sai Prashanthi Vidyaniketan 2020 – 2021
SSC — CGPA: 10 / 10

TECHNICAL SKILLS

Programming: Python, JavaScript, HTML, CSS
Machine Learning: Machine Learning, Model Training & Evaluation
NLP / Generative AI: NLP, Generative AI, LLMs, Prompt Engineering, RAG (Retrieval-Augmented Generation)
Libraries / Frameworks: NumPy, Pandas, Scikit-learn, FastAPI, Node.js
Databases: SQL, Relational Databases
Core CS: Data Structures & Algorithms, Object-Oriented Programming
Tools: Git, GitHub, Jupyter Notebook, FAISS, LangChain

EXPERIENCE

Python Development Intern — Qskill July 2026 – Aug 2026

- Built and debugged Python scripts for real-world data handling tasks, strengthening scripting, troubleshooting, and problem-solving skills.
- Collaborated with mentors on real-world coding assignments, applying core Python concepts and following industry best practices.

PROJECTS

ATS Resume Analyzer | *Python, FastAPI, Scikit-learn, HTML/CSS/JavaScript*

- Preprocessed resume and job description text and applied keyword extraction to identify relevant skills and terms for matching.
- Implemented TF-IDF-based similarity scoring using Scikit-learn to compute a match score between a resume and a target job description.
- Built a FastAPI backend to serve scoring results and a responsive HTML/CSS/JavaScript frontend to display them in real time.

Smart Mail Alert | *Python, NLP, Node.js, Twilio API*

- Built an automated pipeline to retrieve and process incoming emails using Python.
- Applied NLP and Machine Learning techniques to classify each email as Important, Normal, or Spam.
- Integrated a Node.js backend with the Twilio WhatsApp API to send automated real-time notifications for high-priority emails.

RAG-Based Document Q&A Assistant | *Python, LangChain, FAISS, FastAPI, SQL*

- Processed uploaded PDF documents by extracting and splitting their text into overlapping chunks for retrieval.
- Generated vector embeddings for each chunk and indexed them with FAISS to enable similarity search against user questions.
- Passed retrieved context into a prompt-engineered LLM call to generate a grounded answer, and logged sessions via a FastAPI backend with SQL-based storage.

CERTIFICATIONS

- Cloud Computing — IBM
- AI/ML — Infosys Springboard
- Data Analytics Job Simulation — Deloitte (Forage)
- Python — Cisco
- Generative AI — Forage

ACHIEVEMENTS

- Solved 400+ Data Structures & Algorithms problems on LeetCode spanning arrays, strings, trees, graphs, and dynamic programming.
- Earned LeetCode badges for consistent problem-solving and sustained practice.
- Participated in Smart India Hackathon (SIH) 2025 and various competitive programming contests to sharpen algorithmic problem-solving under time constraints.
